An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. George McGuire on June 20, 2008.

The application has been amended as follows:

In the specification:

On page 1, line 5, the following has been added after 2003: -- Now US Patent 7083574 --.

In the claims:

In claim 1, line 12, after the word NO, the following has been deleted: "the ratio of CO₂ to O₂ relative to expired volume"

Claim 9 has been canceled.

Claim 22 has been added:

-- Claim 22. (new). A system for non-invasively diagnosing abnormal respiratory function, comprising:

a patient breathing tube;

a flow meter connected to said tube;

a spectrometer interconnected to and in fluid communication with said tube,
wherein said spectrometer is adapted to detect the concentration of gasses present in
the tube;

and

data processing means interconnected to said flow meter and said spectrometer,
wherein said data processing means is programmed to calculate and display the ratio of
CO₂ to O₂ relative to expired volume. –

Claim 22 was rewritten separately from claim 1 for the following reason. As
rewritten, claim 1 did not find support in either of the earlier case, and as a result, only
had an effective date of 4/1/2004. Publication 2003/0060725, which is the US
publication of applicant' earlier application 09/965303, disclosed the system including
the data processing device that calculated and displayed the ratio of relative to expired
volume." The earlier publication had a publication date of 3/27/2003. As such, it was a
102(b) reference and anticipated claims 1 and 9. However, when claim 22 was
rewritten separately, it found support in the parent application, 09/965303, and thus had
an effective filing date of 9/27/2001. As such, publication 2003/0060725 was no longer
available as a reference and the claim was allowable.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ROBERT L. NASSER whose telephone number is (571)272-4731. The examiner can normally be reached on m-f 9-5.
